

Sandeep Sahani

Hi, I am a software developer and tech enthusiast.

I work at [Accrete AI](#). In my free time, I love exploring new technologies, experimenting with different programming languages, and creating tools that make my life (and hopefully yours) easier. I enjoy solving tricky problems. Take a look at my projects if you're curious!

- Phone: **+91 9987150448**

- Email: sahanisandeep@pm.me

- Location: Mumbai, IN

- Education:

Vivekanand Education Society's Institute Of Technology

2016-2019 - Mumbai University

Bachelor of Engineering | Computer Software Engineering

- Side Projects:

Sylmark a Markdown LSP as PKMS

A Markdown LSP that works as a personal knowledge management system, linking notes and ideas seamlessly.

Job Experience

Feb 2020 - Present - ~6 Years+

◆ Accrete AI

Nov 2022 - Present - 3 Years+ [website](#)

Senior Engineer I

- Created complex components ([Gantt Chart](#) & [Knowledge Graph](#)) for shared UI lib.
- Created [Gantt Chart using d3js](#) [from scratch](#)
- Individual contributor and code reviewer of react apps.
- Fix security vulnerabilities in the app.

Software Engineer II

- Planned and refactored data flows of the app migrating from localStorage to server states.
- Created **unique and challenging** UI components ([Annotation](#) & [Relationship Highlight](#)) for AI training needs.
- Introduced team to new tech, libs and helped adopt, along with standard code formatting standards and branching schemes.
- Updated lagging (several major versions) Angular app to latest versions.

◆ Kuch Naya - Aurionpro - Auropay

Sep 2020 - Nov 2022 - 2yrs 2Months [website auropay](#)

Sr Software Engineer

- **Designed & Developed embed-able payment widget** using **solidjs**. Similar to stripe elements from scratch.
- Optimized heavy angular app, code reviews and deployment.
- Assisting with application architecture and research work.
- Introduced standard code committing, branching and also enforced using git hooks and bash scripting.

Software Engineer

- Worked on several products with several teams in payments, banking and medical domain.
- **JSON driven web scraping**, JSON driven dynamic form integration.
- Integrated a 3rd party widget in vanilla javascript application for payments.
- Designed and developed a **node module for bulk items uploads** in system with multiple tables and dynamic fields with API calls, with complex field and business level validations.

◆ Cateina

Jr. Software Engineer

Feb 2020 - Sept 2020 - 8months

- Lead team of 3 devs working on [comgo.io](#) a blockchain powered donation platform.
- Full stack work with both front-end and back-end development
- Along with development, was responsible for deployments and backups
